

Product Overview

Kemtron manufacture a range of gaskets to suit many standard size connectors which require an EMI/RFI gasket with optional environmental seal. The choice of material is vast and connector gaskets are available from virtually all of the flat sheet EMI materials manufactured by Kemtron. Listed below are a range of gaskets available from our own tools, also a list of the more common materials and thicknesses. If those listed below do not meet with your exact requirements, we would be pleased to manufacture gaskets to your own design using inexpensive tooling.

Notice

Information supplied in these data sheets is based on independent and laboratory tests which Kemtron believes to be reliable. Kemtron has no control over the design of customer's product which incorporates Kemtron's products, therefore it is the responsibility of the user to determine the suitability for his particular application and we recommend that the user make his own test to determine suitability.

The product described in this data sheet shall be of standard quality, however the products are sold without warranty of fitness for a particular purpose, either expressed or implied, except to the extent expressly stated on Kemtron's invoice, quotation or order acknowledgement. How to order

Material	Thickness (mm)	Material code
410	0.8mm	1
420	0.8mm	2
410	1.6mm	3
420	1.6mm	4
525	0.5mm	5
535	0.8mm	6
515	0.5mm	7
545	0.8mm	8
1200 SNG	1.6mm	9
1200 SSA	1.6mm	10
1200 SSC	1.6mm	11

Select the table number e.g: 93 then choose material from the list. EG: 3 followed by the shell size or for D connectors the number of pins. EG: shell 18

Example

93/18 = Connector gasket to suit MIL-C-38999 dimensions using Kemtron 410 material in thickness 1.6mm in shell size 18.
