

Product Overview

Kemtron offers a wide range of products designed for all areas of environmental sealing for electronic instruments, cabinets and enclosures from flat gaskets, extrusions, O-Rings and form in place. We are able to offer materials that have wide temperature ratings, long operational life, IP sealing, resistance to fluids and NBC chemicals, UL94 listings for fire retardancy, low toxicity products etc, many available from stock.

Kemtron can offer precision cutting, slitting, kiss-cutting, extrusions, mouldings, form in place dispensing direct to surfaces and a comprehensive range of vulcanized silicone O-Rings. Kemtron has full facilities available to self-adhesive back materials, provide integral compression stops or collars to prevent gasket damage and fabrication of gaskets, etc.
